FLTA002 TO THE BLACK

Press Kit, September 2022

MAKING SPACE FOR EVERYONE

MISSION DETAILS

To The Black Mission

Alpha Flight 2: To The Black is Firefly's second technology demonstration flight that will attempt to launch multiple satellites to low Earth orbit (LEO) from our launch site (SLC-2) at Vandenberg Space Force Base. Alpha will first insert into an elliptical transfer orbit, coast to apogee, and perform a circularization burn.

MISSION NAME

FLTA002 | To The Black

ROCKET

Alpha

LAUNCH LOCATION

SLC-2 Vandenberg Space Force Base, USA

TARGET ORBIT

TOTAL PAYLOAD MASS

Approx. 35 kg

LAUNCH AZIMUTH

240° CW from North

PAYLOAD DESTINATION ALTITUDE

300 km

PAYLOAD DESTINATION INCLINATION

137 deg

VIEWING

Launch will be live streamed by **Tim Dodd**, **Everyday Astronaut**, starting approximately T-60 minutes

LOCATION

To The Black Launch

Firefly conducts Polar and SSO launches to high inclinations from SLC-2 at Vandenberg AFB, California. Figure below shows ground track for FLTA002's retrograde orbit and launch azimuths from VAFB. Other orbit inclinations may be possible, inquire with Firefly for additional details.

ABOUT

ALPHA

Firefly Alpha is designed to address the needs of the burgeoning small-satellite market.

At a dedicated mission price of \$15M, Alpha combines the highest payload performance with the lowest cost per kilogram to orbit in its vehicle class.

Capable of delivering 1 metric ton to Low Earth Orbit (LEO) and 630 kg to the highly desirable 500 km Sun-Synchronous Orbit (SSO), Alpha will provide launch options for both.

DAY OF

Launch Schedule

HH:MM:SS from Lift Off	Events
T-08:00:00	Final Pad Checkouts
T-07:00:00	Power up of Alpha
T-06:50:00	Sensor Checks
T-06:00:00	Helium Load Begins
T-05:15:00	Fuel Load Begins
T-04:30:00	Pad Clear
T-03:40:00	LOx Load Begins
T-00:20:00	Terminal Count
T-00:00:01.79	Ignition of Stage 1
T+00:00:00	Lift Off!
T+00:01:13	Maximum Aerodynamic Pressure (MaxQ)
T+00:02:37	Main Engine Cut Off (MECO)
T+00:02:40	Stage Separation
T+00:02:42	Stage 2 Ignition
T+00:03:25	Fairing Jettison
T+00:07:40	Second Engine Cut Off #1 (SECO 1)
T+00:53:37	Stage 2 Ignition #2
T+00:53:39	Second Engine Cut Off #2 (SECO 2)
T+00:59:57	Serenity Deploy
T+01:00:57	TES-15 Deploy
T+01:01:57	PICOBUS Deploy

PAYLOADS

FLTA002 | To The Black

The payloads will be placed inside the Alpha payload fairing on top of our Space Utility Vehicle (SUV) structure.

Organization: Teachers in Space

Payload Name: Serenity

Class: 3U CubeSat

Deployer: Firefly 3U CubeSat Dispenser

Mission: To collect atmospheric pressure, temperature, and radiation data and make it available for the educational community while also testing the effect of radiation on block chain transactions.

Organization: NASA Ames Research Center

Payload Name: TechEdSat-15 (TES-15)

Class: 3U CubeSat

Deployer: Firefly 3U CubeSat Dispenser

Mission: Deploy an articulated exo-brake to test deorbit targeting through drag modulation. Other experiments include the Beacon And Memory Board Interface (BAMBI), which optimizes internal and external data transfer from the nano-sat.

Organization: Libre Space Foundation

Payload Name: PicoBus

Class: Pocketcube Deployer for 5 picosatellites

Mission: Test the worlds first fully free and open-source telecommunications constellation and demonstrate long-range telecommunications ability.

Organization: Teachers In Space, Girls Scouts of Austin, Jonna Ocampo

Payload Name: Firefly Capsule

Class: Capsule of Artwork

Mission: Raise space enthusiasm for children by flying artwork to orbit including:

- 128 Postcards from Teacher In Space made by children around the country
- Henry the Astronaut, a book by Jonna Ocampo
- Space Artwork by the Girl Scouts of Austin

ABOUT

Firefly Aerospace

Firefly is developing a family of launch and in-space vehicles and services that provide industry-leading affordability, convenience, and reliability. Firefly's launch vehicles utilize common technologies, manufacturing infrastructure and launch capabilities, providing LEO launch solutions for up to ten metric tons of payload at the lowest cost per kg in the small-launch class. Combined with Firefly's in-space vehicles, such as the Space Utility Vehicle and Blue Ghost Lunar Lander, Firefly provides the space industry with a single source for missions from LEO to the surface of the Moon or beyond. Firefly is headquartered in Cedar Park, TX. For more information please see: www.fireflyspace.com
